

It's Foolish to Suffer

You may be brave enough to stand backache, or headache, or dizziness. But if, in addition, urination is disordered, look out! If you don't try to fix your kidneys, you may fall into the clutches of kidney trouble before you know it. But if you live more carefully and help your kidneys with Doan's Kidney Pills, you can stop the pains you have and avoid future danger as well.

An Indiana Case
Peter Ransdell, 1225 Spruce St., Indianapolis, Ind., says: "My back often got lame and sore and pained me when I tried to stoop. I had dizzy spells, too, with sharp, rheumatic twinges in my loins. I have used Doan's Kidney Pills for this trouble and they have fixed me up in good shape, making me feel like a different man. I give them my highest praise."

Powerful Combination.
Tim was a protégé of Mr. Blank, a well-known lawyer. He was often in trouble, but by personal influence with the courts Mr. Blank managed to have him let down easy, so it became a matter of talk that he did not suffer greatly in being arrested.

"How is it, Tim," someone asked one day, "that you are arrested so often, but never go to jail nor pay any fines?"

"It's just this way," Tim replied. "I have Mr. Blank for my lawyer, and what he doesn't know about law I tell him."

Chilly, In Fact.
Singleton—Didn't you find it pretty hot last night out your way?
Weddelgh—No! I arrived home late and got a very cool reception.

The Wretchedness of Constipation

Can quickly be overcome by **CARTER'S LITTLE LIVER PILLS.**

Purely vegetable—act surely and gently on the liver. Cure Biliousness, Headache, Dizziness, and Indigestion. They do their duty. **SMALL PILL, SMALL DOSE, SMALL PRICE.**

A Woman's Problem

How to Feel Well During Middle Life Told by Three Women Who Learned from Experience.

The Change of Life is a most critical period of a woman's existence, and neglect of health at this time invites disease and pain. Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs. Read these letters:—

Philadelphia, Pa.—"I started the Change of Life five years ago. I always had a headache and backache with bearing down pains and I would have heat flashes very bad at times with dizzy spells and nervous feelings. After taking Lydia E. Pinkham's Vegetable Compound I feel like a new person and am in better health and no more troubled with the aches and pains I had before I took your wonderful remedy. I recommend it to my friends for I cannot praise it enough."—Mrs. MARGARET GRASSMAN, 759 N. Ringgold St., Philadelphia, Pa.

Beverly, Mass.—"I took Lydia E. Pinkham's Vegetable Compound, for nervousness and dyspepsia, when I was going through the Change of Life. I found it very helpful and I have always spoken of it to other women who suffer as I did and have had them try it and they also have received good results from it."—Mrs. GEORGE A. DUNBAR, 17 Roundy St., Beverly, Mass.

Erie, Pa.—"I was in poor health when the Change of Life started with me and I took Lydia E. Pinkham's Vegetable Compound, or I think I should not have got over it as easy as I did. Even now if I do not feel good I take the Compound and it restores me in a short time. I will praise your remedies to every woman for it may help them as it has me."—Mrs. E. KISSLING, 931 East 24th St., Erie, Pa.

No other medicine has been so successful in relieving woman's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass. Such letters are received and answered by women only and held in strict confidence.

To Drive Out Malaria And Build Up The System

Take the Old Standard GROVE'S TASTELESS chill TONIC. You know what you are taking, as the formula is printed on every label, showing it is Quinine and Iron in a tasteless form. The Quinine drives out malaria, the Iron builds up the system. 50 cents.

Antidote for Loneliness.
A little North side miss, whose mother is dead, lives with her little brothers and sister at the home of her grandmother. Her father, who is a physician, has his office and home in another part of the city.

Surrounded by everything which brings happiness to the heart of a child, the little girl's thoughts often wandered to poor daddy, who was all alone.

One day she surprised her grandmother with the startling remark: "Grandma, I wish daddy was a policeman."

"A policeman, dear! Why? Daddy is a physician, and that is a very good profession, you know."

"Yes, grandma," persisted the child, "but if daddy was a policeman he wouldn't be so lonesome."—Indianapolis News.

THE BLUE THAT'S TRUE.

Red Cross Ball Blue gives to clothes a clear, dazzling white, whiter than snow, not a greenish-yellow tinge like cheap bottle blue. Buy Red Cross Ball Blue for next washday. You will be happily surprised. Large package at your grocers, 5 cents.—Adv.

The Vital Point.

A beautiful young lady interviewed a fortune teller on the usual subjects. "Lady," said the clairvoyant, "you will visit foreign lands and the courts of kings and queens. You will conquer all rivals and marry the man of your choice. He will be tall and dark and aristocratic looking."

"And you?" interrupted the lady.

"Yes, and very rich."

The beautiful lady grasped the fortune teller's hands and pressed them hard.

"Thank you," she said. "Now tell me one thing more. How shall I get rid of my present husband?"

BABY'S ITCHING SKIN

Quickly Soothed and Healed by Cuticura. Trial Free.

Bathe with hot water and Cuticura Soap. If there is any irritation anoint gently with Cuticura Ointment on end of finger. Refreshing slumber for restless, fretful babies usually follows the use of these super-creamy emollients. They are a boon to tired mothers.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Americanizing Foreigners.

It is reported that 37 schools in Chicago are affording instruction to alien residents tending to make good citizens of them. During the last session there were 487 such pupils of adult age at the Jones Public school. They represented 23 nationalities.

FIGHT AGAINST WEEDS

Constant Losses Call for Vigorous Crusade by Farmers.

To Rid Country of Noxious Plants Would Put Agriculture Forward Almost Incalculably—Simple Methods Effective.

The fact that farmers are crying for relief from the weed pest, and that the government is trying to aid them, is one of the encouraging signs of the day. To rid the country of weeds would put agriculture forward almost incalculably.

An enormous amount of labor is involved every year in the extermination of weeds. Not only are these weeds troublesome to cultivated agricultural crops, but they are troublesome in meadows and pastures. The cornfields and cultivated crops generally must be kept clean if a crop is to be produced. Of course, the farmer would want to till his soil whether weeds occurred or not. A soil that is not cultivated would not produce a remunerative crop. But the weeds have come to stay, and the farmer must till the soil to keep the weeds in subjection.

Persistence by simple methods will be more effective than spasmodic efforts and oftentimes more expensive

Black Mustard.

processes. While direct methods may often be effective, the most successful will be those having to do with the conditions of agriculture and the methods of tillage and increase the productivity of the soil.

Weeds grow where they can find room to grow. Some crops then permit certain weeds to grow with them, while another weed may find congenial conditions with another crop. Thus cockle and cheat have grown with wheat perhaps as long as wheat has been cultivated.

Purslane and pigweeds are always found in gardens, thistles and mulleins in pastures, whitetop in meadows.

If the pea vine, horse nettle, crabgrass, foxtail, ragweed, etc., become serious in the cornfield, sow it down to grass, one crop in the rotation destroying these weeds gaining a foothold with the preceding crop. Thorough cropping of the land and judicious systematic rotation of the crops, are conditions against which no weeds can stand; and, inasmuch as these are all vital conditions of successful agriculture, it may be said that weeds are never serious when the land is well farmed.

Purslane was cultivated for greens in Massachusetts and later taken to Michigan, where it was grown for the same purpose. Wild carrot, morning-glory, poppy and others have escaped

Horse Nettle—Apple of Sodom.

from the old vegetable and flower gardens and in many cases have become serious pests.

Black mustard is a tall, coarse, much-branched annual, two to five feet high; leaves variously divided, or only deeply cut, the terminal lobe the largest, sharply toothed. The upper leaves small, simple, as a rule linear. Leaves generally not smooth, but somewhat bristly, at least on the veins. Flowers yellow, smaller than in charlock. Pods smooth, about one-half inch long, four-cornered, tipped with slender beak. Seeds black or reddish-brown, smaller than charlock.

MUCH CATTLE FEED WASTED

Failure to Utilize Full Value of Material Increases Cost of Meat Production.

A vast quantity of feed available for cattle is now either wasted absolutely or put to some less profitable use, according to a recent report of the department of agriculture. Failure to utilize the full value of their material has increased unnecessarily the cost of producing meat, has diminished the profits from cattle feeding, and has discouraged many farmers from engaging in an industry essential to their permanent prosperity.

According to this report, the loss in grain, straw and corn stover amounts to more than \$100,000,000 annually. Both of these products are disposed of most economically when fed to cattle in connection with some form of concentrated feed. Straw is especially valuable in carrying the breeding herd through the winter, in wintering stockers and as a supplementary roughage for fattening cattle. Stover, too, is an excellent feed for wintering cattle, especially mature breeding cows. Nevertheless, in many sections of the country where these products are abundant, little attempt is made to take advantage of their value for these purposes.

CLOVER AND ALFALFA BLOAT

Trouble Is Due to Fermentation of Sugar Contained in Blossoms—Formalin Is Favored.

(By DR. C. C. LIPP)

According to circular 5 of the Kentucky experiment station, it has been found that the cause of bloat in cattle following the eating of either clover or alfalfa pasture is due to the fermentation of the sugar contained in the blossoms. Red clover blossoms contain about 3.6 per cent sugar, alfalfa blossoms 2.8 per cent. Soon after being eaten, fermentation begins, resulting in the production of a considerable quantity of carbon dioxide. This distends the first stomach or rumen and produces the condition known as bloat.

The authors of the Kentucky bulletin strongly recommend the use of formalin for this condition. One quart of a 1½ per cent solution is given as a drench. This 1½ per cent solution is made by adding three tablespoonfuls of formalin to one quart of water. Gentle exercises should be given the animal if possible after the medicine has been given. This treatment is simple, safe, and inexpensive, and should be kept on hand so that it may be used on a moment's notice should necessity require.

AMPLE SHADE FOR HOGHOUSE

Easy to Arrange Attachment to Afford Shelter for Animals Running in Treeless Lot.

On any of the portable shed-roof hoghouses that are now in common use it is easy to arrange an attachment to give outdoor shade for the hogs that may be running in a treeless lot or pasture. By arranging the supporting

Shade for Hogs.

timber along the ends of the house, as shown in the illustration, the shade may be easily put in place. This shade attachment is separate from the house itself and may be easily moved.

REMEDIES FOR LICE ON HOGS

Nebraska College of Agriculture Says Crude Oil Probably Cheapest and Most Effective.

Of the remedies commonly used for lice on hogs, the Nebraska college of agriculture says that crude oil is probably the cheapest and the most effective, as it kills not only the lice, but the nits as well at one application. The most convenient method of applying is by means of a hog oiler, of which there are several good types. These have the advantage of being always ready and need little attention except keeping oil supplied. The best type of oiler is one that enables the pig to get the oil to all parts of the body. If there is any indication of skin disease, the part should be scrubbed with a broom or brush so as to get the oil well into the skin. Where crude oil is used, it will be noticed that the skin and hair are improved in appearance. Where the floors of the pens or sheds are of dirt, a liberal application of " " will keep down the dust as well as in killing lice.

CARE OF CREAM IN SUMMER

Cleanliness Is First Rule to Observe—Dirty Surroundings Result in Poor Milk.

During the hot days of summer the farmer who is selling cream to the creamery finds it a problem to keep his cream in the proper condition. However, there are but a few simple rules which should be followed that would result in better cream. First of all these is cleanliness. Dirt, remember, carries bad flavors. If the barn or its surroundings and cows are dirty it will result in poor milk; poor milk results in poor cream; poor cream results in poor butter.

No Sale for 'em.

"How shall I mark that lot of ladies' hosiery we're sending back to the mill?" asked the department store buyer.

"What is the matter with them?" inquired the manager.

"They're too thick. Nobody ever wears that kind any more, even in the winter."

"Mark them 'Rejected on account of low visibility.'"

Important to Mothers
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher*

In Use for Over 30 Years.
Children Cry for Fletcher's Castoria

A Guess.

"Why does a politician wear a string tie?"

"To string his constituents."—Louisville Courier-Journal.

If you think there is a demand for labor at high rates, go out and seek a job.

Libby's Vienna Sausage and Sliced Dried Beef

Both contain less heat producing properties than heavy meats.

Try them for summer luncheon and picnic tidbits.

Nautical Plainman.
"What's become of your prairie schooner?" asked the man on the western plains.

"I don't know," said the man addressed. "You know we had a cyclone here yesterday, and the last I saw of the schooner it was sailing north by east."

Most Likely.

"What is the use of this article?" asked a shopper.

"I really don't know," replied the clerk; "I think it is intended to be sold for a Christmas present."

TO hold "its place in the sun," is the avowed purpose of a great nation's conflict. To hold "its place in the sun," is the object of every business in the great fight for industrial and commercial supremacy.

To be able to hold "its place in the sun," is the supreme test of an asphalt roof. It is the sun, not rain or snow, that plays havoc with a roof. If it can resist the drying out process of the sun beating down upon it, day after day, the rain or snow will not affect it except to wash it clean and keep it sanitary.

Certain-teed Roofing

takes "its place in the sun" and holds it longer than other similar roofing, because it is made of the very best quality roofing felt, thoroughly saturated with the correct blend of soft asphalts, and coated with a blend of harder asphalts. This outer coating keeps the inner saturation soft, and prevents the drying out process so destructive to the ordinary roof.

The blend of asphalts used by "The General" is the result of long experience. It produces a roofing more pliable than those which have less saturation, and which are, therefore, harder and drier.

At each of the General's big mills, expert chemists are constantly employed to refine, test and blend the asphalts used; also to experiment for possible improvements. Their constant endeavor is to make the best roofing still better.

The quality of CERTAIN-TEED is such that it is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply). Experience proves that it lasts longer. Behind this guarantee is the responsibility of the world's largest manufacturer of roofings and building papers.
